Predmet: Zahtjev za hitno uvrštavanje na dnevni red i usvajanje Zakona o dopunama Zakona o električnoj energiji u Federaciji Bosne i Hercegovine prije izbora 2022. godine

Poštovani zastupnici, delegati i članovi rukovodstva oba doma Parlamenta Federacije Bosne i Hercegovine,

obraćamo Vam se sa zahtjevom da što hitnije na dnevni red oba doma Parlamenta Federacije Bosne i Hercegovine uvrstite usvajanje »Zakona o dopunama Zakona o električnoj energiji«.

WWF Adria podružnica je Svjetske organizacije za zaštitu prirode i aktivno djeluje u zemljama naše regije. Već niz godina pratimo temu malih hidroelektrana i borbu lokalnih zajednica diljem Zapadnog Balkana koje su jasno izrazile svoju želju da se devastacija rijeka zaustavi.

Ovim putem obraćamo se u ime više od 20.000 građana naše regije koji su svojim potpisima odlučno rekli 'NE' uništavanju naših rijeka i traže zaustavljanje poticaja za male hidroelektrane i sprječavanje njihove izgradnje.

U junu 2020. godine usvojili ste »Zaključak o zabrani gradnje i reviziji postojećih malih hidroelektrana«, što je bio značajan korak za zaštitu rijeka Bosne i Hercegovine. Sada Vas pozivamo da ostanete dosljedni i pokažete odgovornost prema građanima Bosne i Hercegovine te stavite na dnevni red ovaj Zakon i usvojite ga u oba doma Parlamenta prije predstojećih izbora.

Ovo je jedinstvena prilika da svojim glasovima zaustavite daljnje uništavanje rijeka Bosne i Hercegovine i podržite volju građana.

Kralja Petra Krešimira IV, Lam. 2, SPC Rondo E: djstefanovic@wwfadria.org
88 000 Mostar – Bosna i Hercegovina W: wwfadria.org

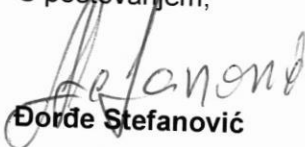

Podsjećamo:

Nakon što je »Zakon o dopunama Zakona o električnoj energiji u Federaciji Bosne i Hercegovine« (FBiH) usvojen u formi nacрта, oba doma Parlamenta FBiH, resorno Ministarstvo energije, rudarstva i industrije kao i Vlada FBiH provele su javne rasprave u aprilu i decembru 2021. godine te su prikupile mišljenja relevantnih institucija. Shodno tome, konačni prijedlog Zakona, u kome je zadržana zabrana, vraćen je u parlamentarnu proceduru na finalno usvajanje.

Napominjemo da se osnovna dopuna predmetnog Zakona odnosi na zabranu izdavanja energetske dozvole za izgradnju novih malih hidroelektrana (osim onih na vodovodima), odnosno praktično zabranu njihove izgradnje u skladu sa »Zaključkom o potpunoj zabrani izgradnje malih hidroelektrana na cijelom prostoru FbiH« koji je usvojen u Predstavničkom domu Parlamenta FBiH 23. juna 2020. godine.

O samim negativnim utjecajima i finansijskoj neisplativosti izgradnje malih hidroelektrana govorili smo kroz medije, studije i formalne zahtjeve upućene donosiocima odluka te ih nije potrebno dodatno spominjati. Važno je samo napomenuti kako izgradnja malih hidroelektrana ne doprinosi energetskej stabilnosti niti neovisnosti Bosne i Hercegovine, za državu je u potpunosti finansijski neisplativa, a šteta po rijeke, prirodu i lokalne zajednice je nemjerljiva.

S poštovanjem,

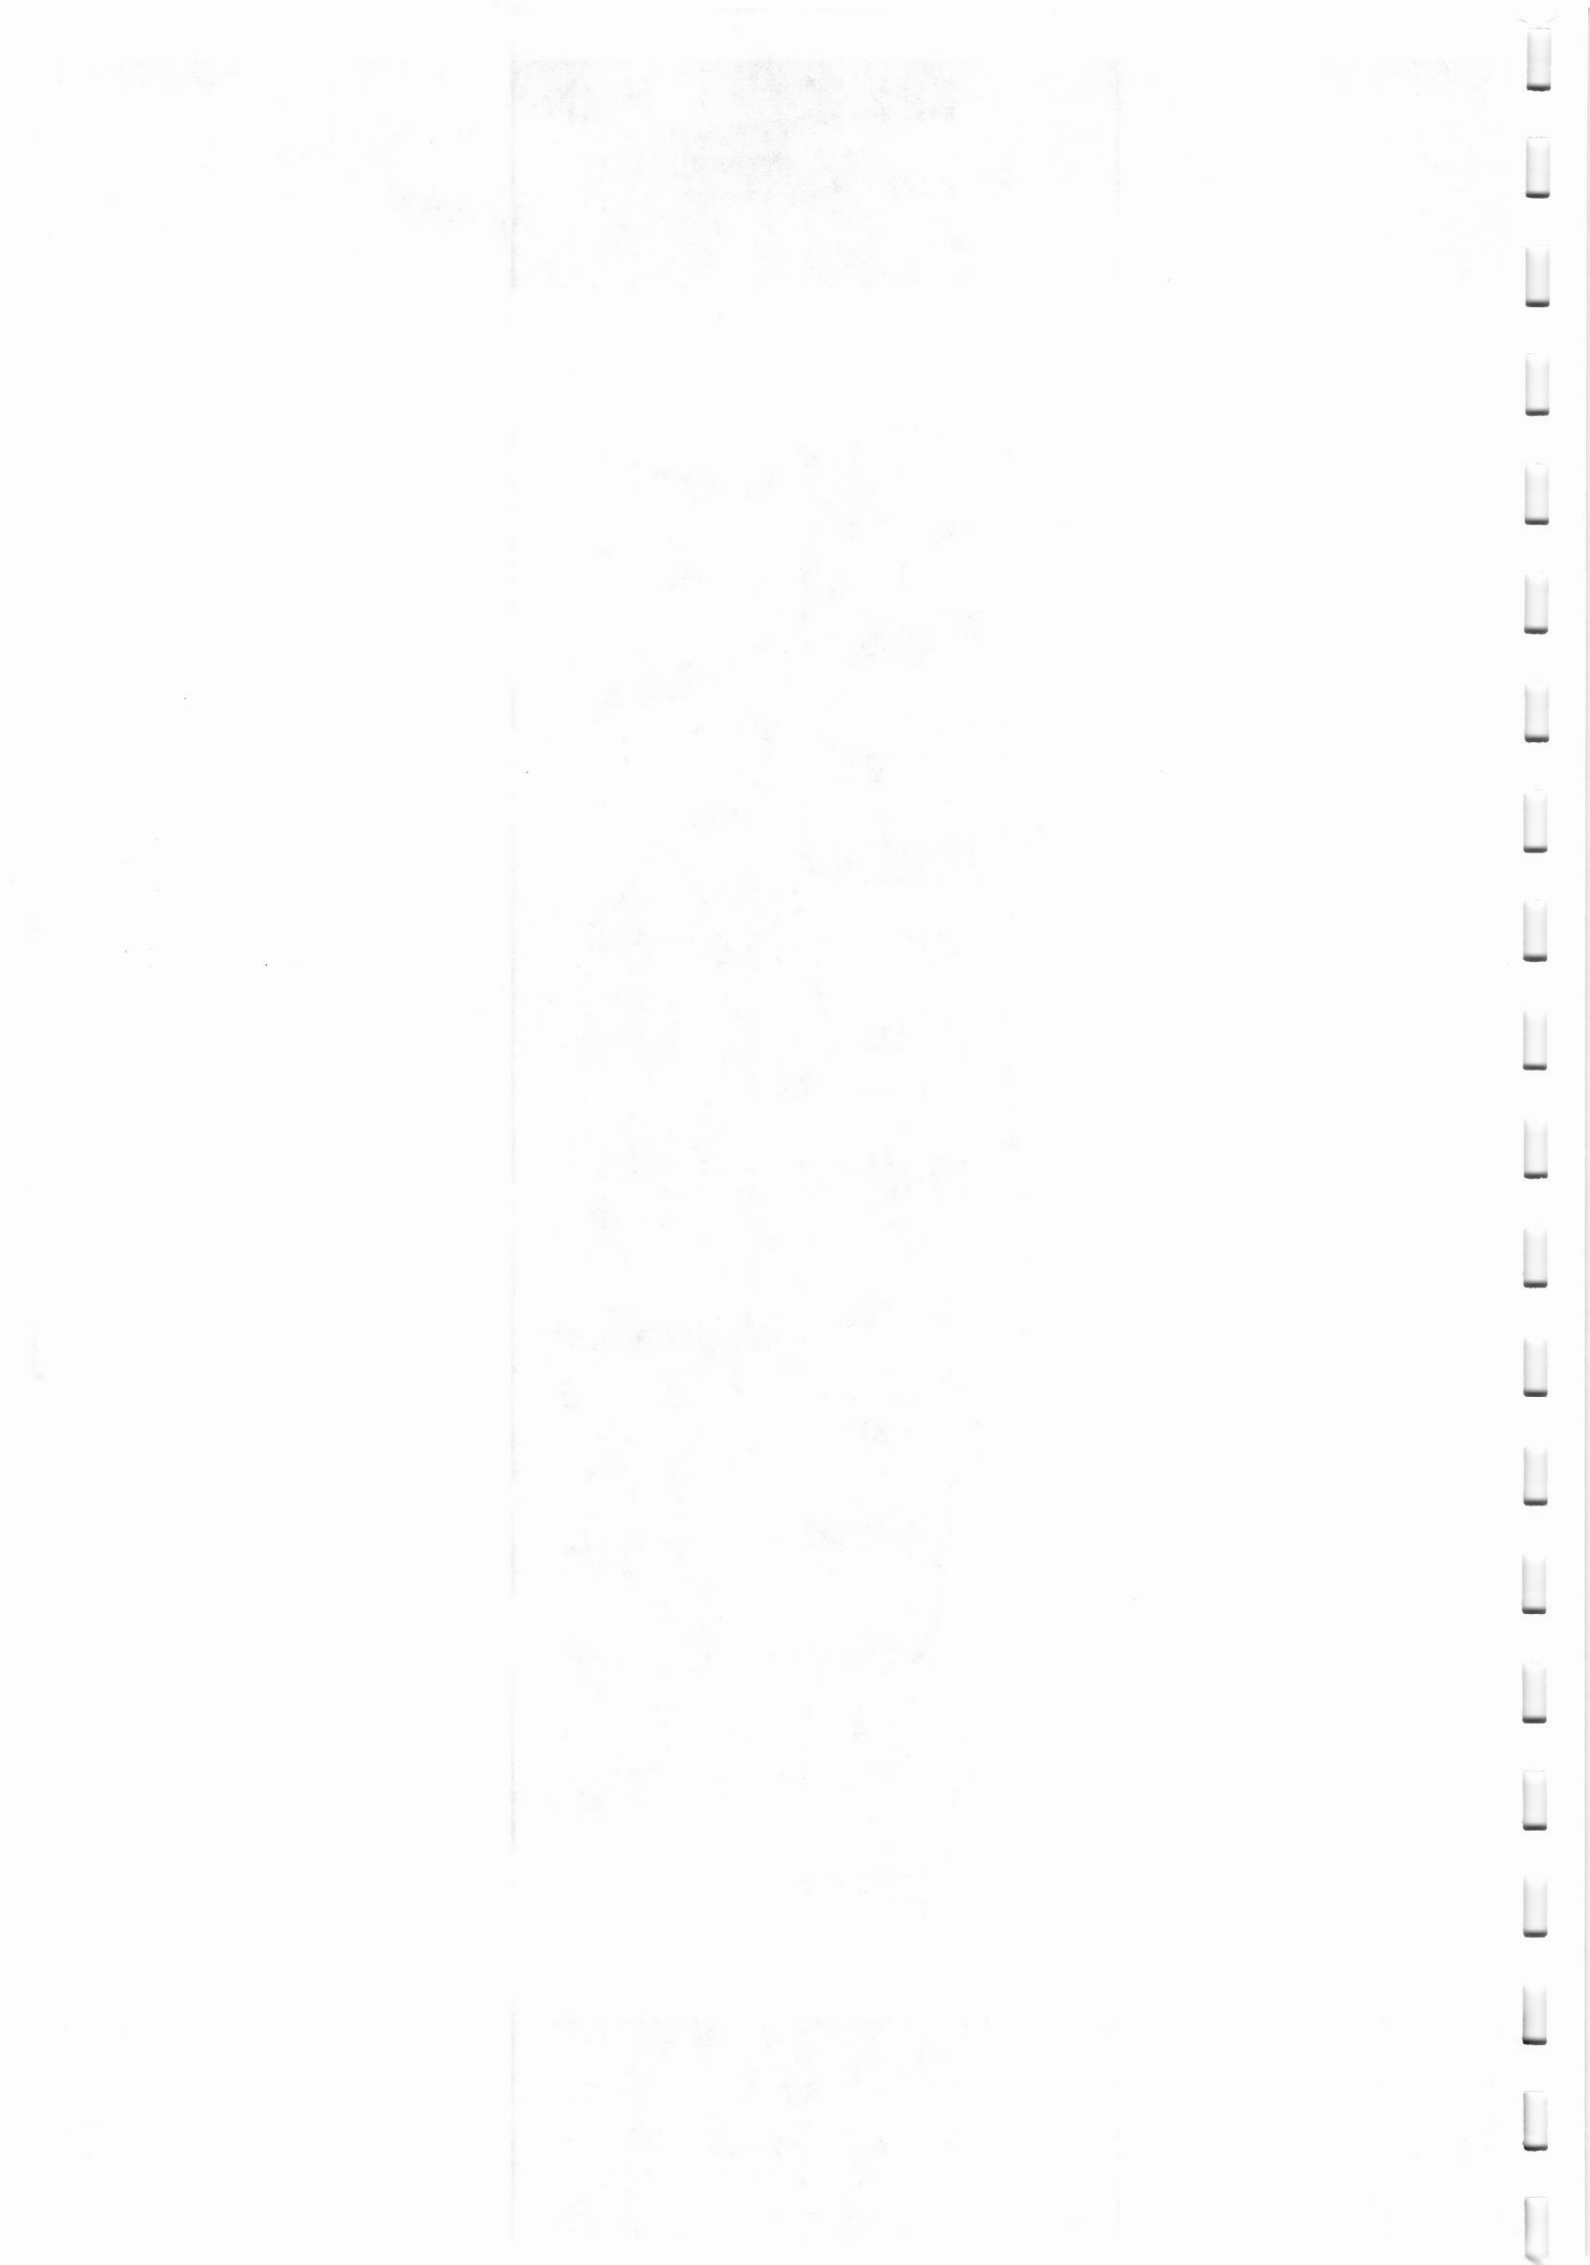

Đorđe Stefanović

Izvršni direktor Udruge Dinarica / WWF Adria u Bosni i Hercegovini

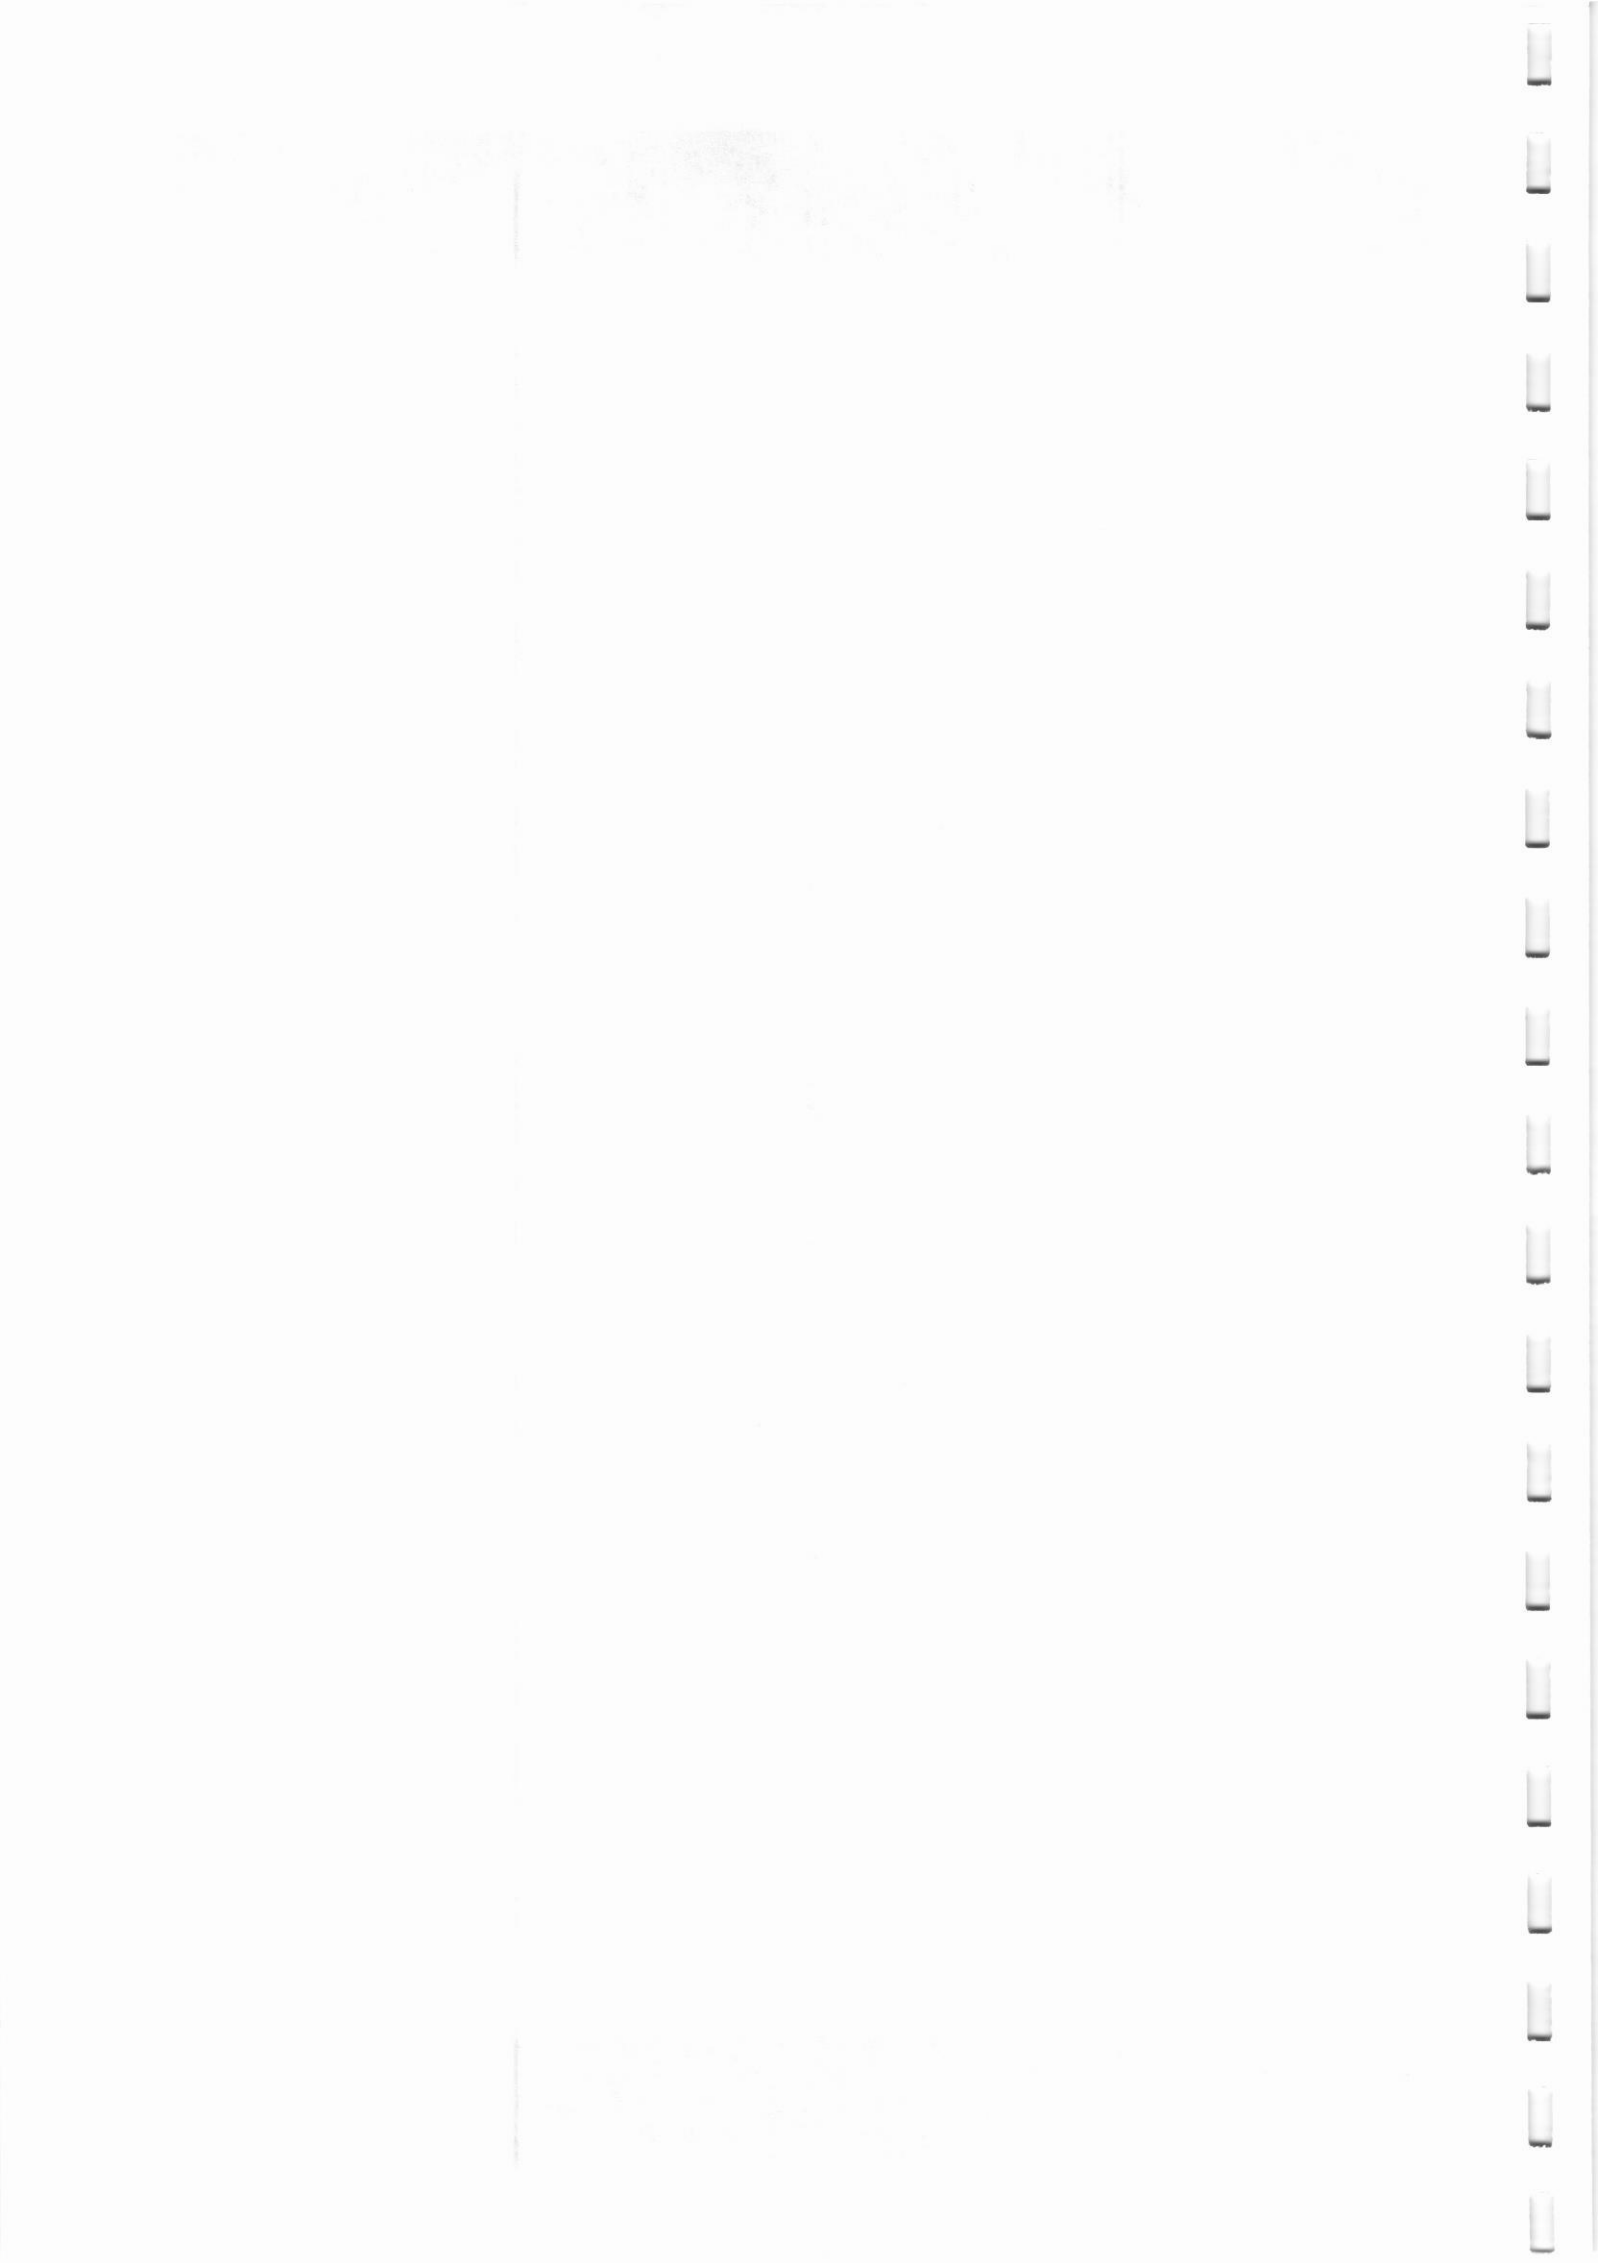

U Mostaru, 9. maja 2022. godine.

⇐ OTVORI ZA VELIKI GUBITAK ⇒

Svjetska organizacija za zaštitu prirode **WWF** pokrenula je kampanju s ciljem uklanjanja državnih poticaja za male hidroelektrane u zemljama Zapadnog Balkana.

ČESTITAMO NA

PRIKUPLJENIH POTPISA PROTIV
GRADNJE MALIH HIDROELEKTRANA!

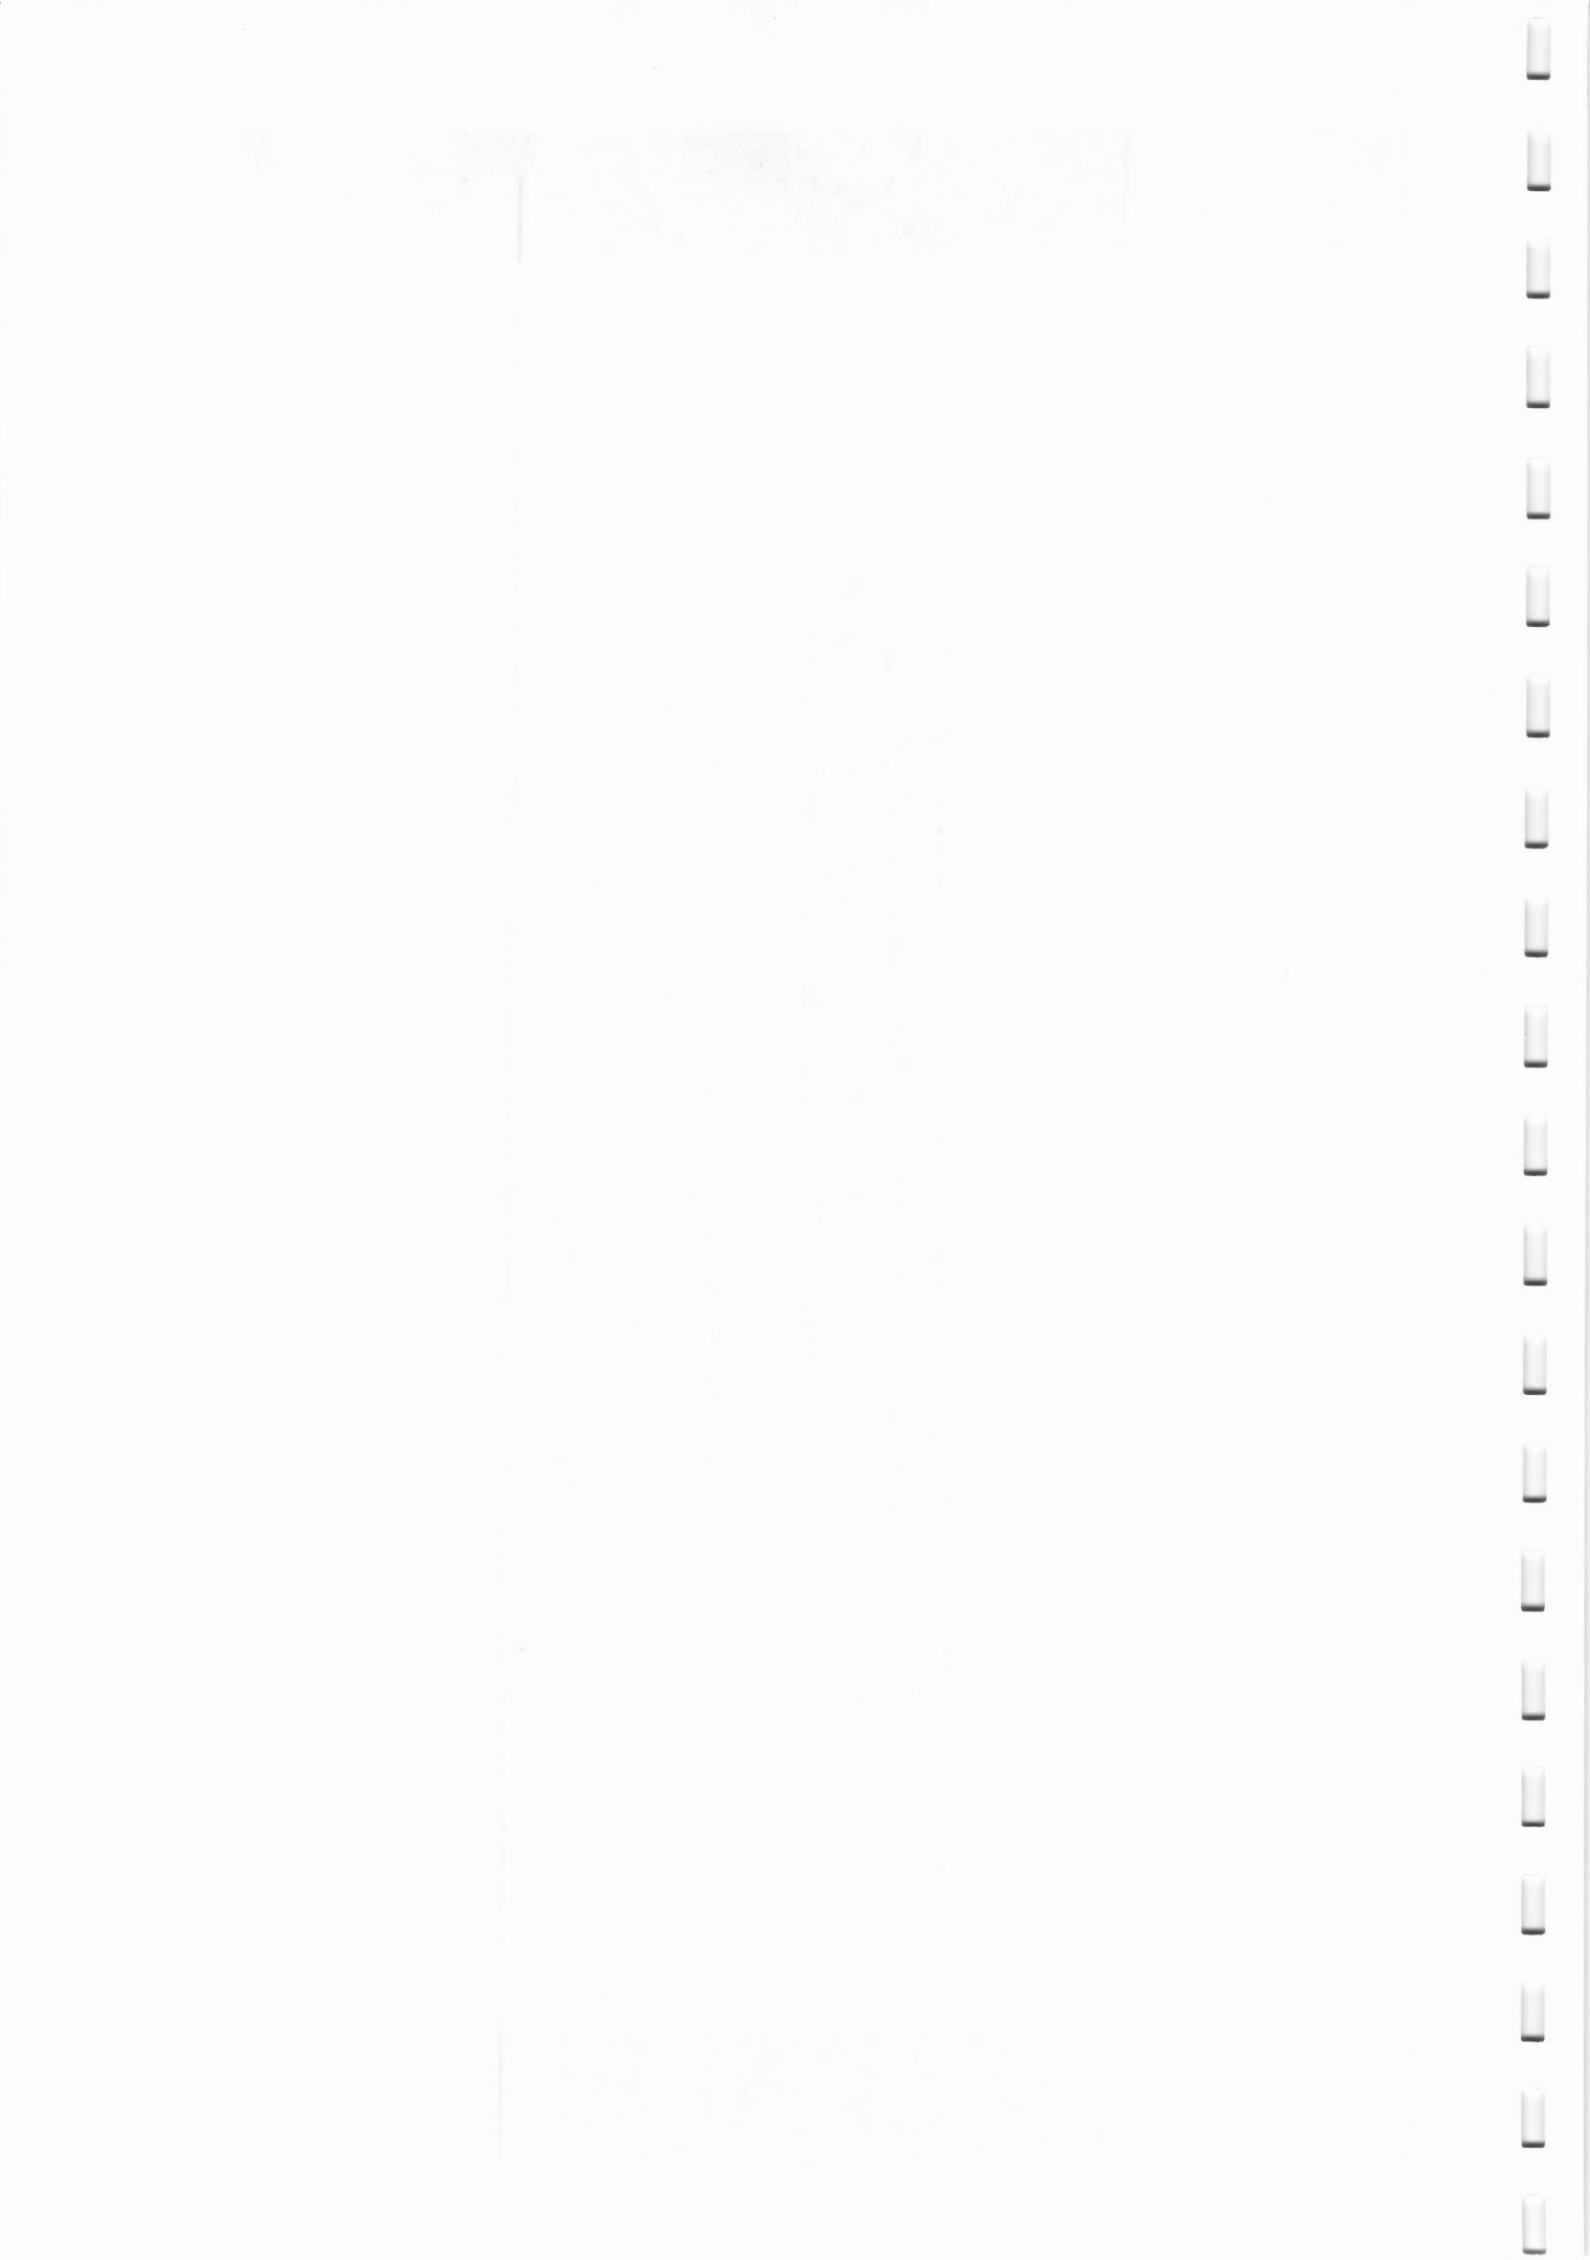

Poštovani Predsjedniče Vlade,

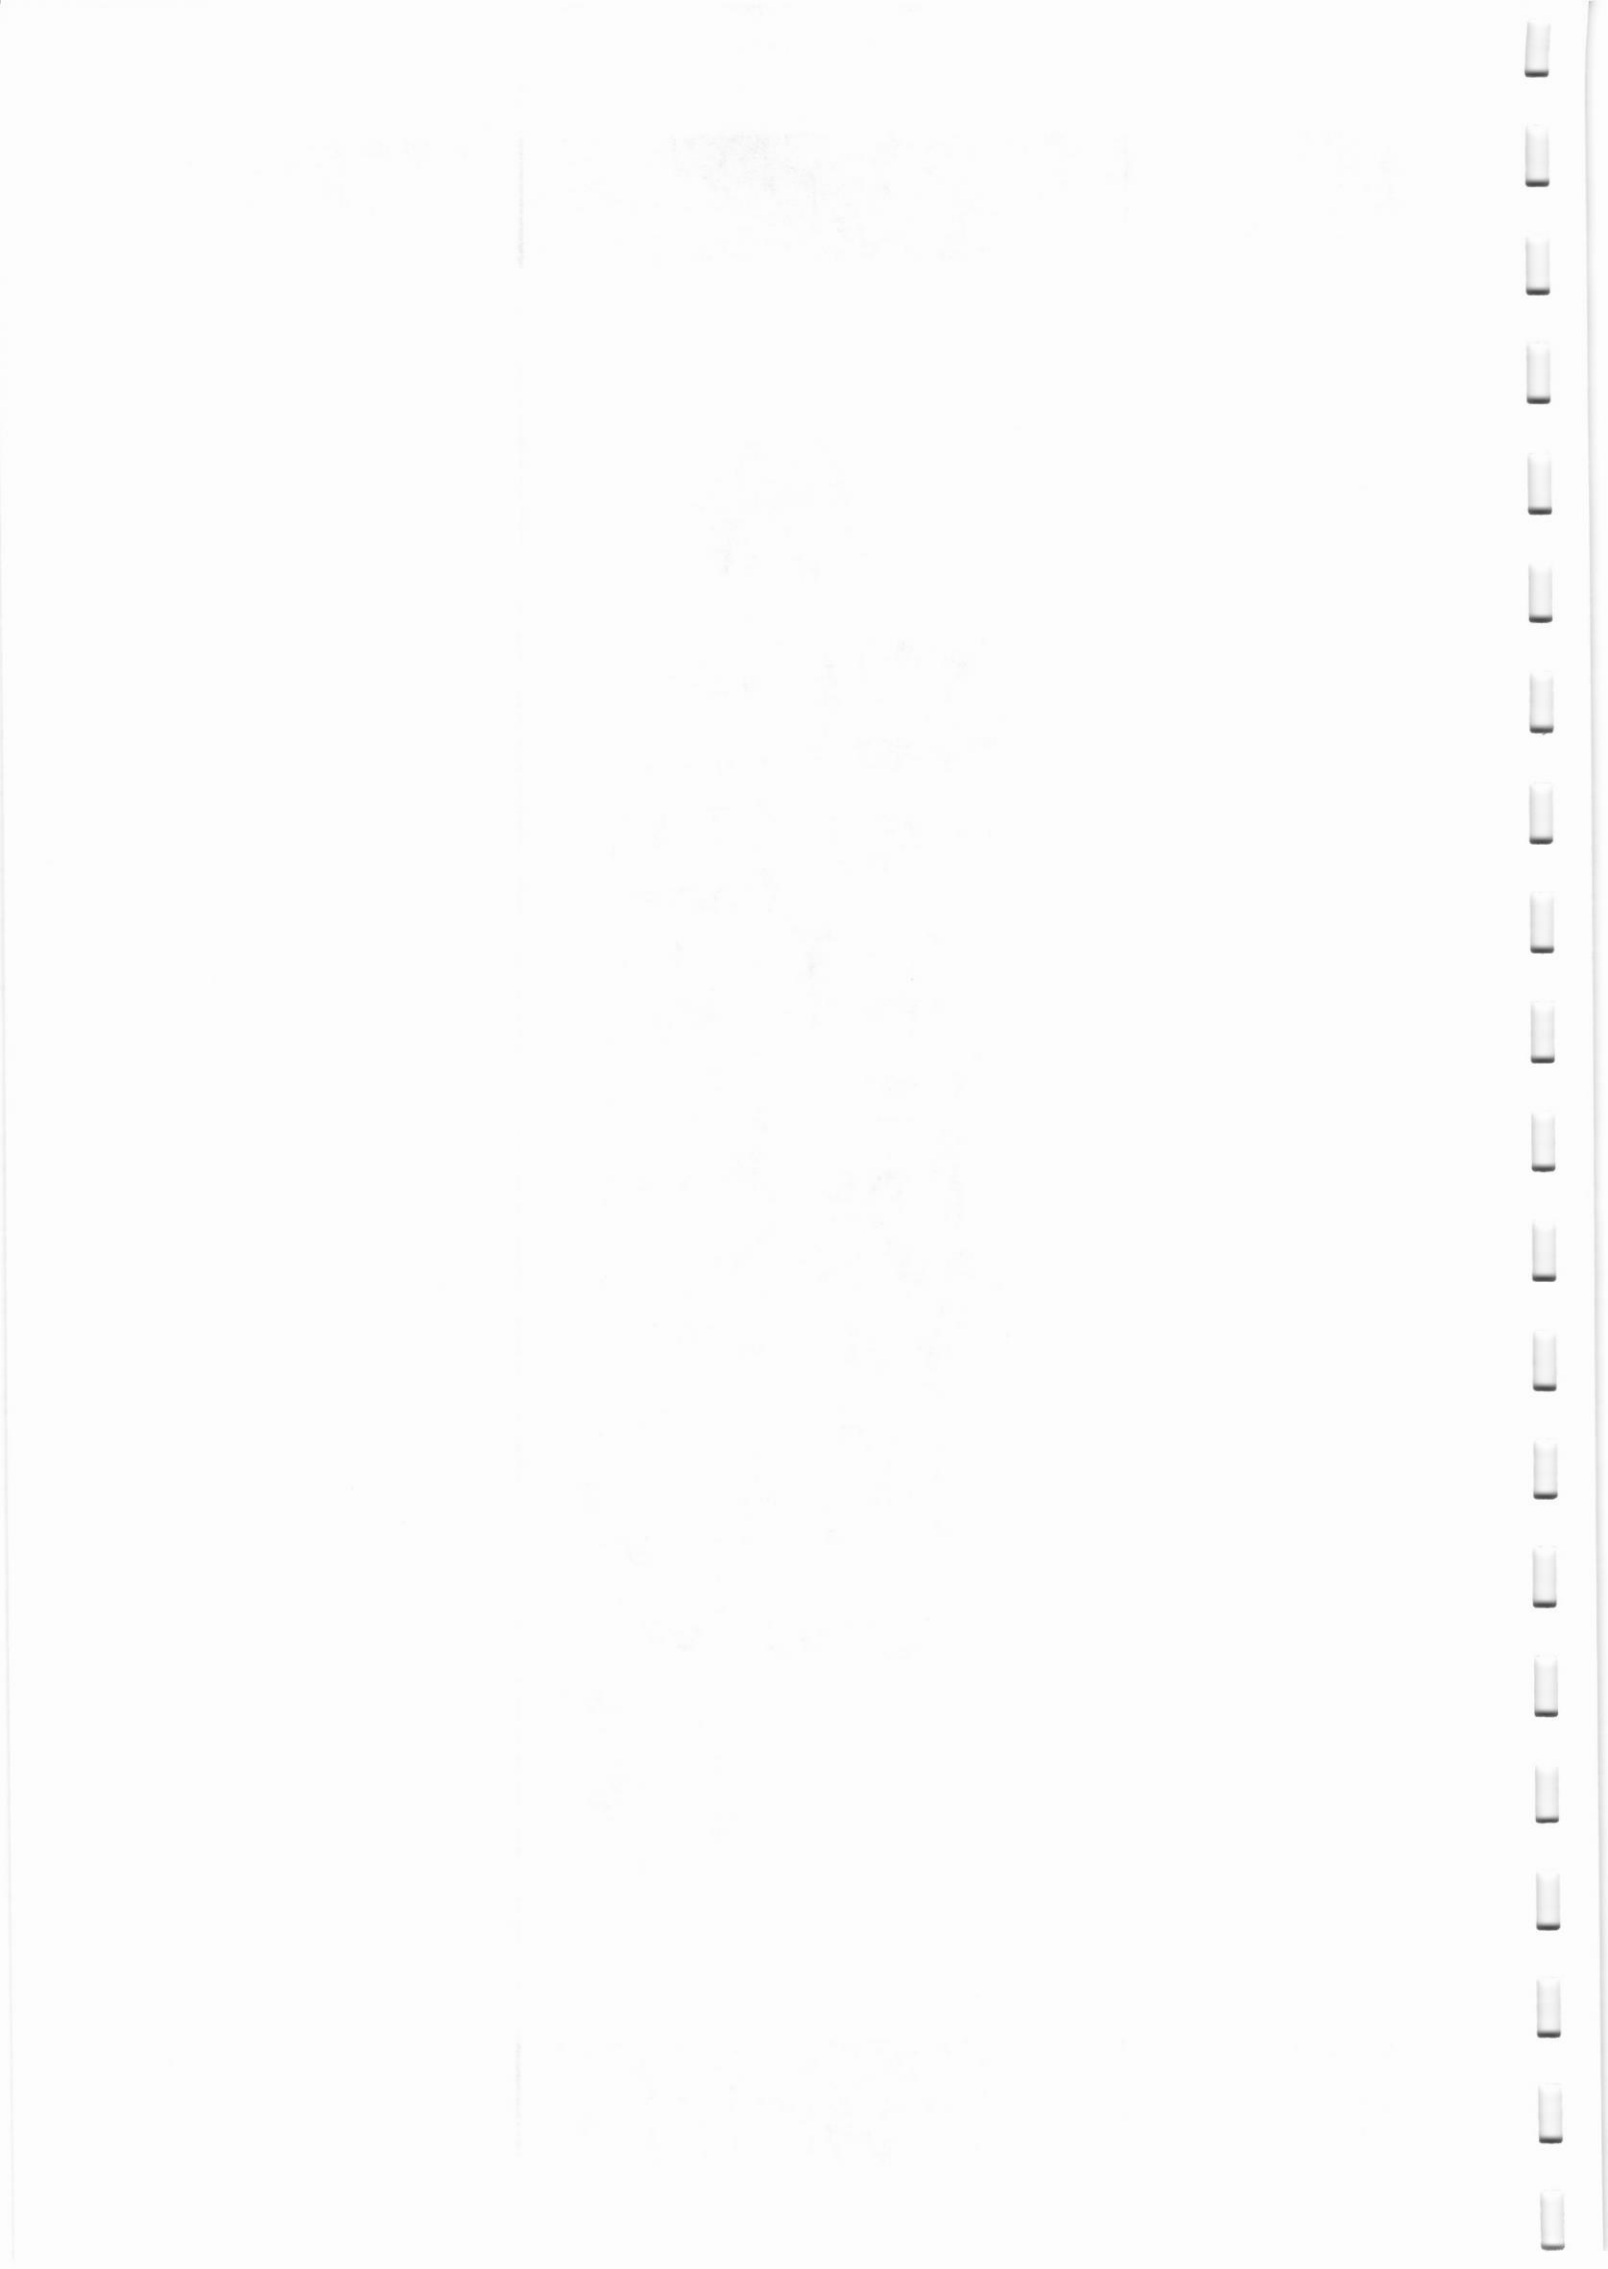

zbog malih hidroelektrana izgubit ćemo naše rijeke i sav pripadajući okoliš
- ljudi će izgubiti domove, plodno tlo i izvore pitke vode, biljke i životinje izgubit će
svoje prirodno stanište, a država će izgubiti većinu sredstava predviđenih za razvoj
obnovljivih izvora energije na najbesmisleniji oblik proizvodnje energije.

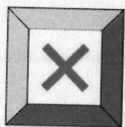

Svi se ovi gubici mogu spriječiti - reagirajte što prije i ukinite državne poticaje za
izgradnju malih hidroelektrana jer je ovo igra u kojoj svi gubimo.

Zahvaljujemo vam u ime rijeka, WWF-a i 20175 gubitnika.

ONTO
ZASSTO
ZAVAZO
ZASTO
ZASTO

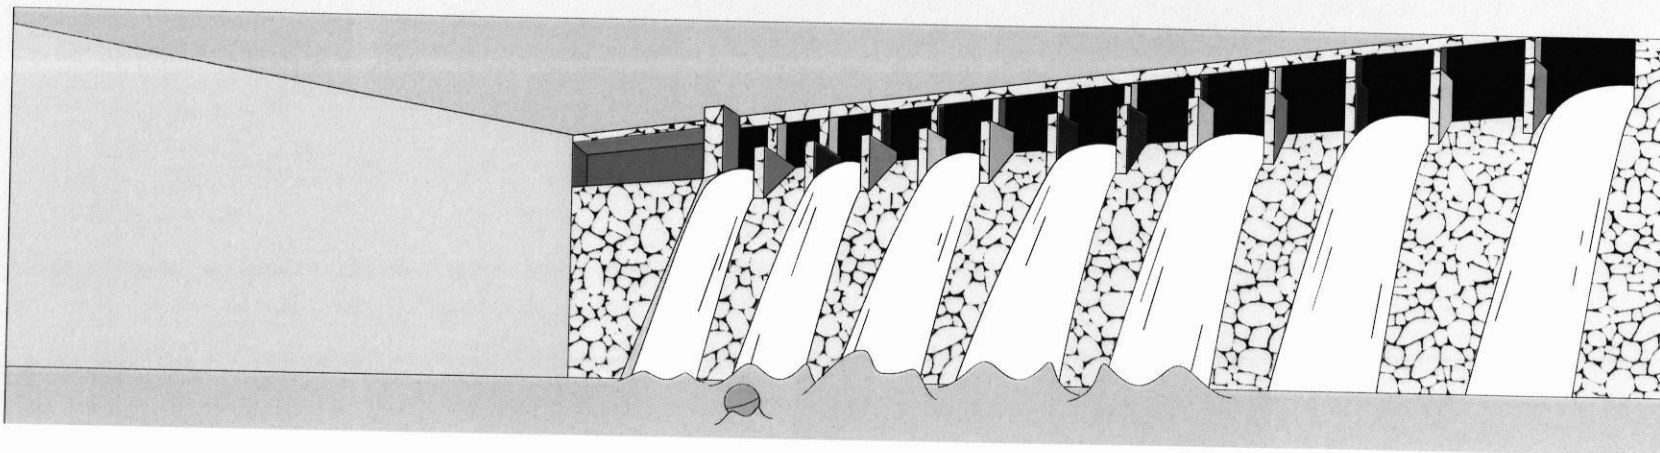

Male hidroelektrane donose puno više štete nego koristi za državu

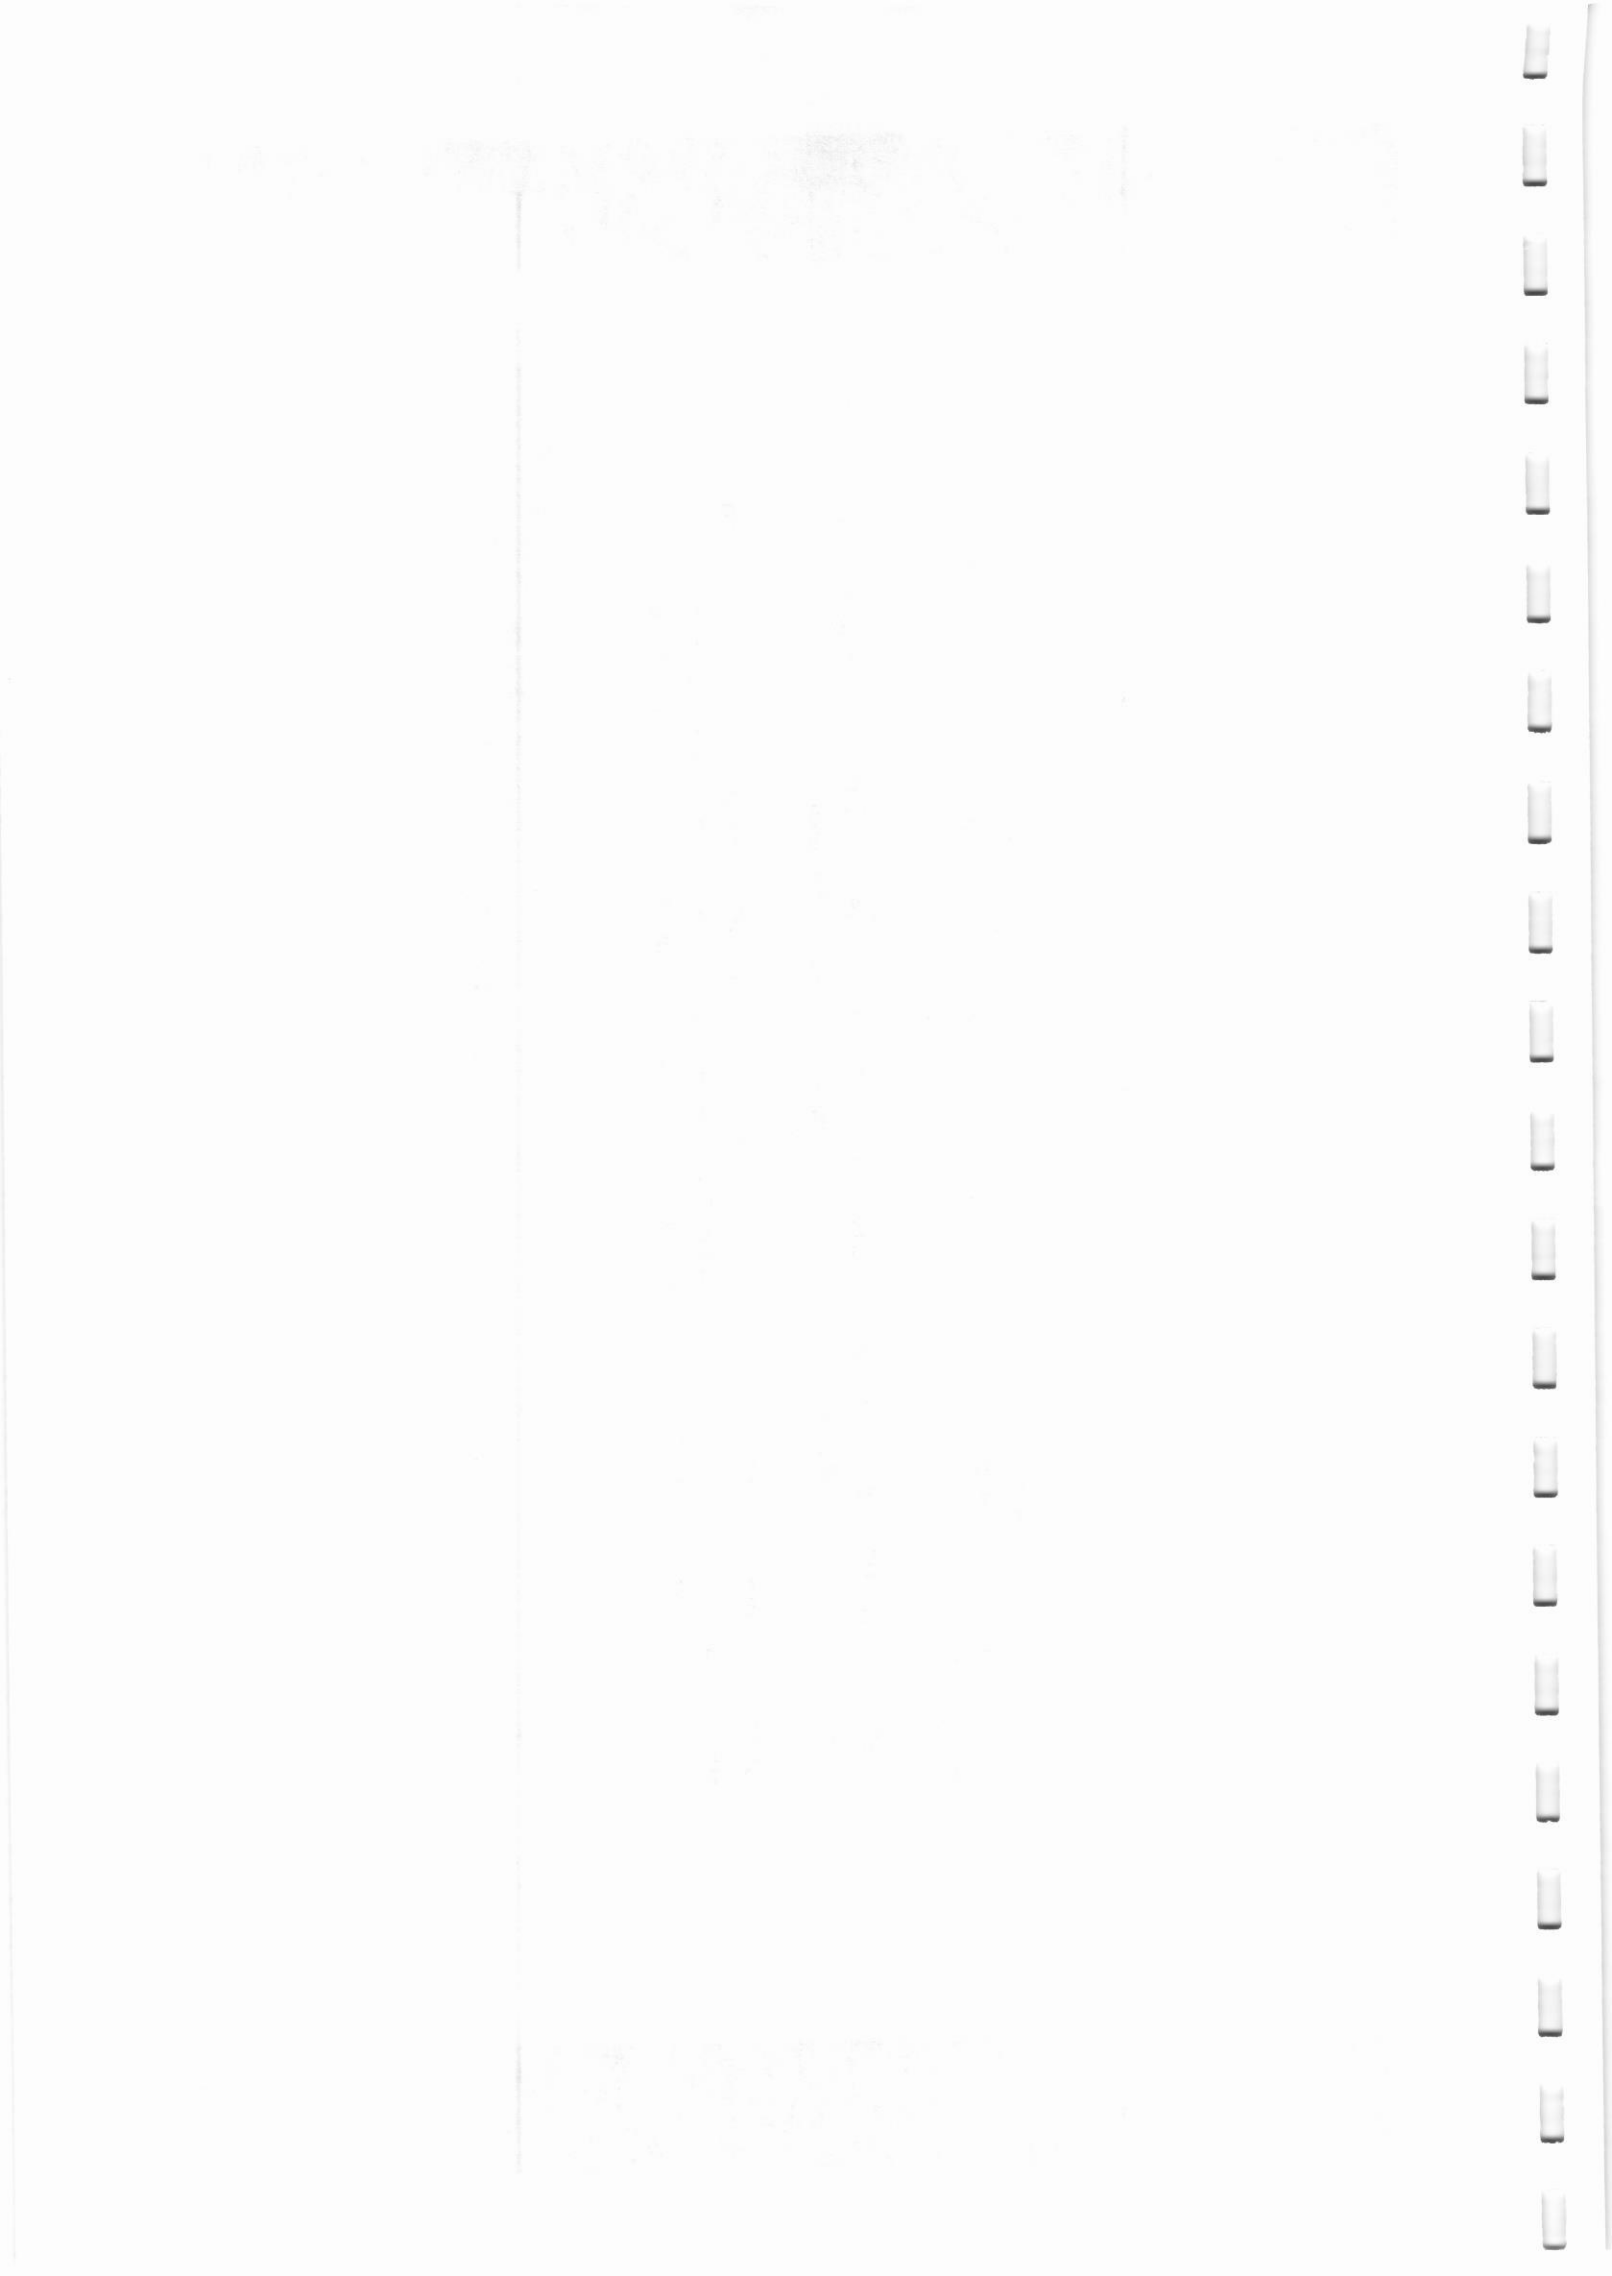

Male hidroelektrane su one do 10 MW snage koje nastaju preusmjeravanjem i fragmentiranjem manjih reka, a često se grade u područjima sa visokim biodiverzitetom, u zaštićenim područjima i nacionalnim parkovima koje onda devastiraju.

U posljednje dvije godine na području zapadnog Balkana izgradnja malih hidroelektrana porasla je za 300%. Ako se sve planirane male hidroelektrane izgrade, preko 5000 km riječnih tokova biće pretvoreno u cijevi.

U 2018. godini 70% državnih podsticaja za obnovljive izvore energije u regiji dodijeljeno je malim hidroelektranama, a one su generirale samo 3,6% ukupne električne energije.

Osim toga, manje se podstiče proizvodnja iz drugih obnovljivih izvora energije poput sunca, a sam sustav podsticaja plodno je tlo za mnoge koruptivne radnje. Od 2015. do 2019. godine države Zapadnog Balkana izdvojile su preko 500.000.000 eura podsticaja za male hidroelektrane.

Znate li što sve gubimo izgradnjom malih hidroelektrana?

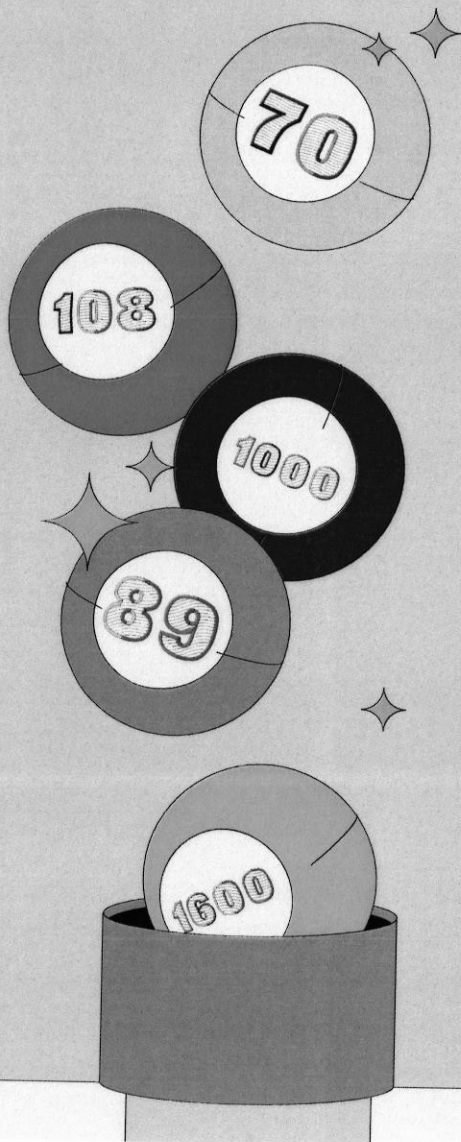

Na regionalnom smo nivou izgubili 70% državnih podsticaja za obnovljive izvore energije 2018. godine na male hidroelektrane koje su generirale samo 3,6% ukupne električne energije.

Izgubićemo 108 od 113 vrsta riječnih riba na Balkanu ako se izgradi planiranih 2700 malih hidroelektrana.

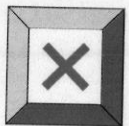

Izgubićemo nacionalne parkove i druge zaštićene dijelove prirode jer će u njima da se izgradi 1000 od ukupno 2700 planiranih malih hidroelektrana na Balkanu.

Izgubićemo najplodniju zonu uz rijeke na Balkanu jer će u njoj da se izgradi 89% od 2700 planiranih malih hidroelektrana.

Izgubili smo 1600 km najočuvanijih rijeka od 2012. godine, a glavni razlog nestajanja je šteta nastala izgradnjom malih hidroelektrana.

Negativan utjecaj malih hidroelektrana je višestruk

SOCIJALNO-PSIHOLOŠKI

Negativan utjecaj na dobrobit i zdravlje lokalnog stanovništva, gubitak identiteta, preseljenje ljudi, gubitak vode i zemljišta

UTICAJ NA HIDROLOŠKI SUSTAV

Promjena toka rijeka, presušivanje izvora pitke vode, smanjeni protok sedimenta

FIZIČKO-KEMIJSKI

Narušavanje kvaliteta vode, smanjenje razine kisika, smanjenje hranjivih tvari u rijeci

UTICAJ NA TLO I ŽIVOTNU SREDINU

Uništavanje šuma uz rijeke, osiromašivanje tla, povećanje rizika od poplava i suša

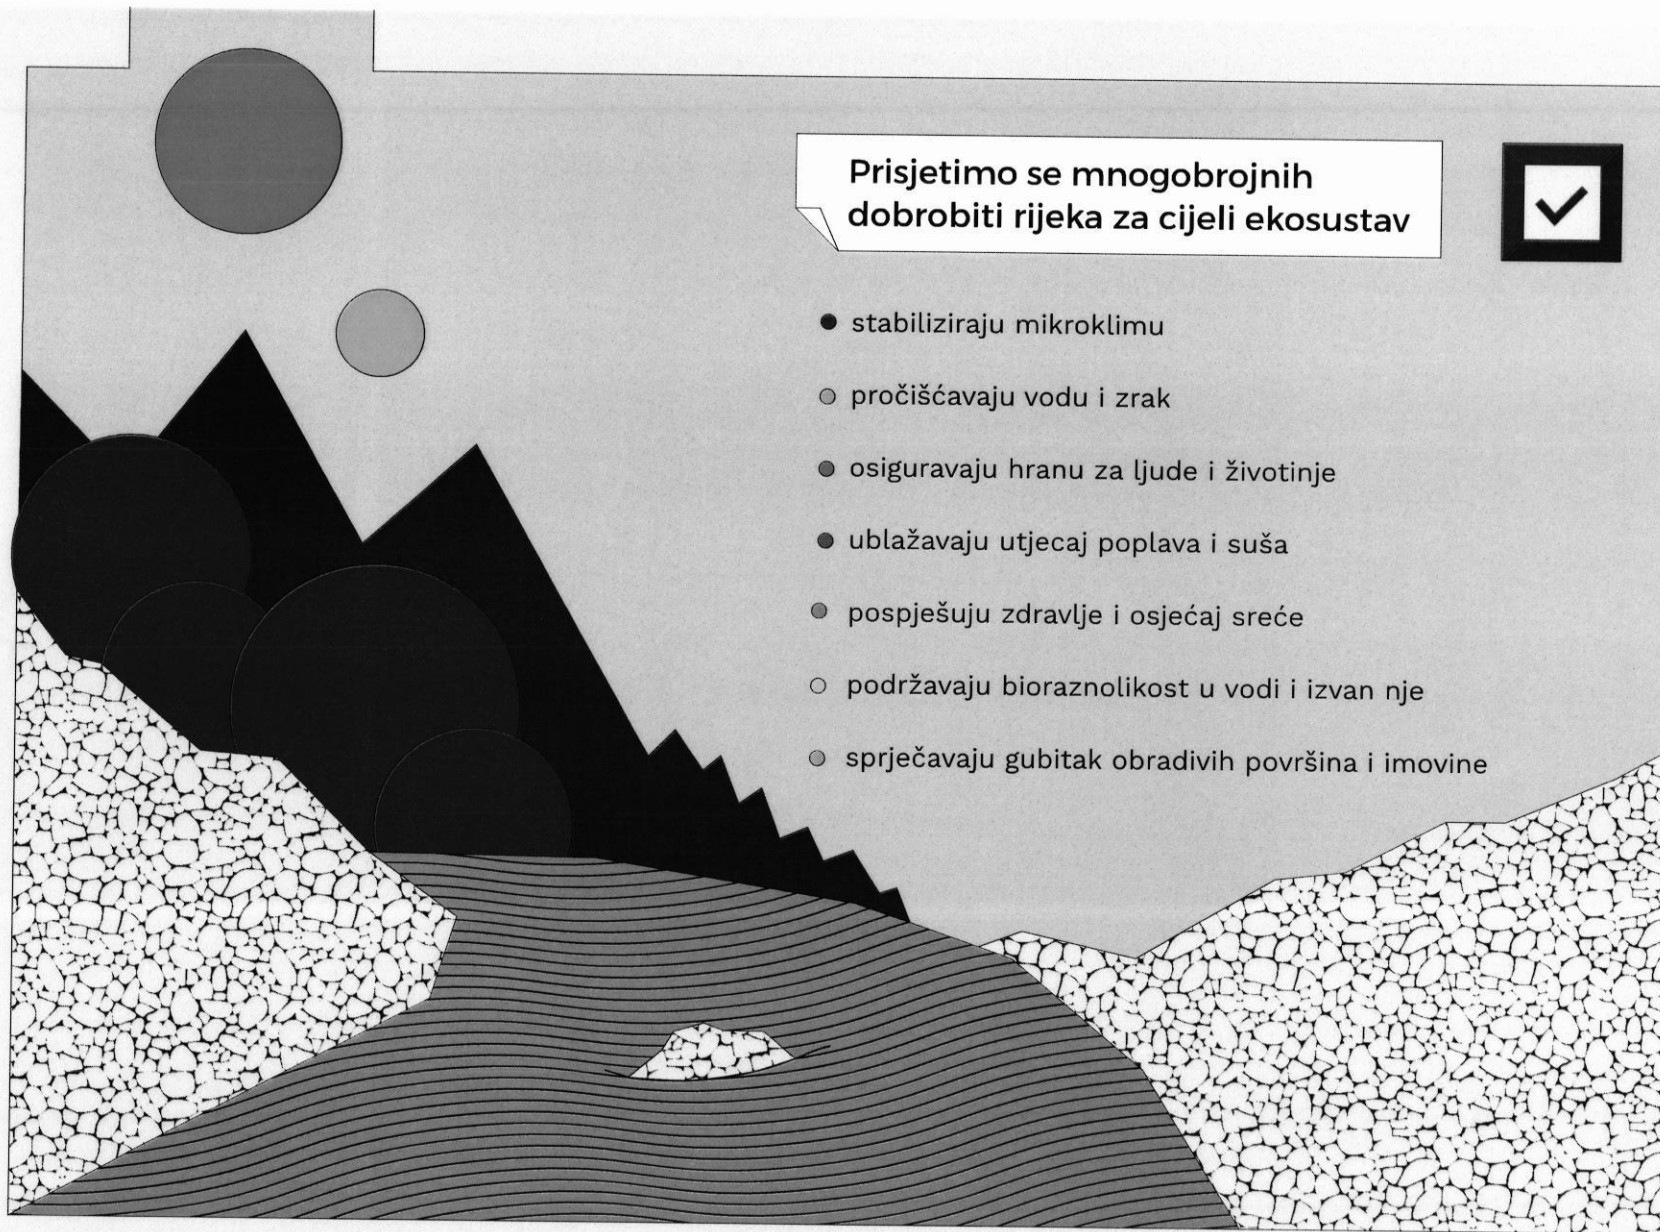

UTICAJ NA EKOSUSTAV

Promjena temperature i vlažnosti, sprječavanje migracije i kretanja riba, nestanak ribljih vrsta, rast ugroženih vrsta biljaka i životinja, nestanak ključnih staništa

EKONOMSKI

Povećani računi za struju, smanjenje prilika za održivi razvoj, negativan utjecaj na turizam (nema više kupališta niti raftinga), utjecaj na poljoprivredu (nema navodnjavanja niti napajanja domaćih životinja)

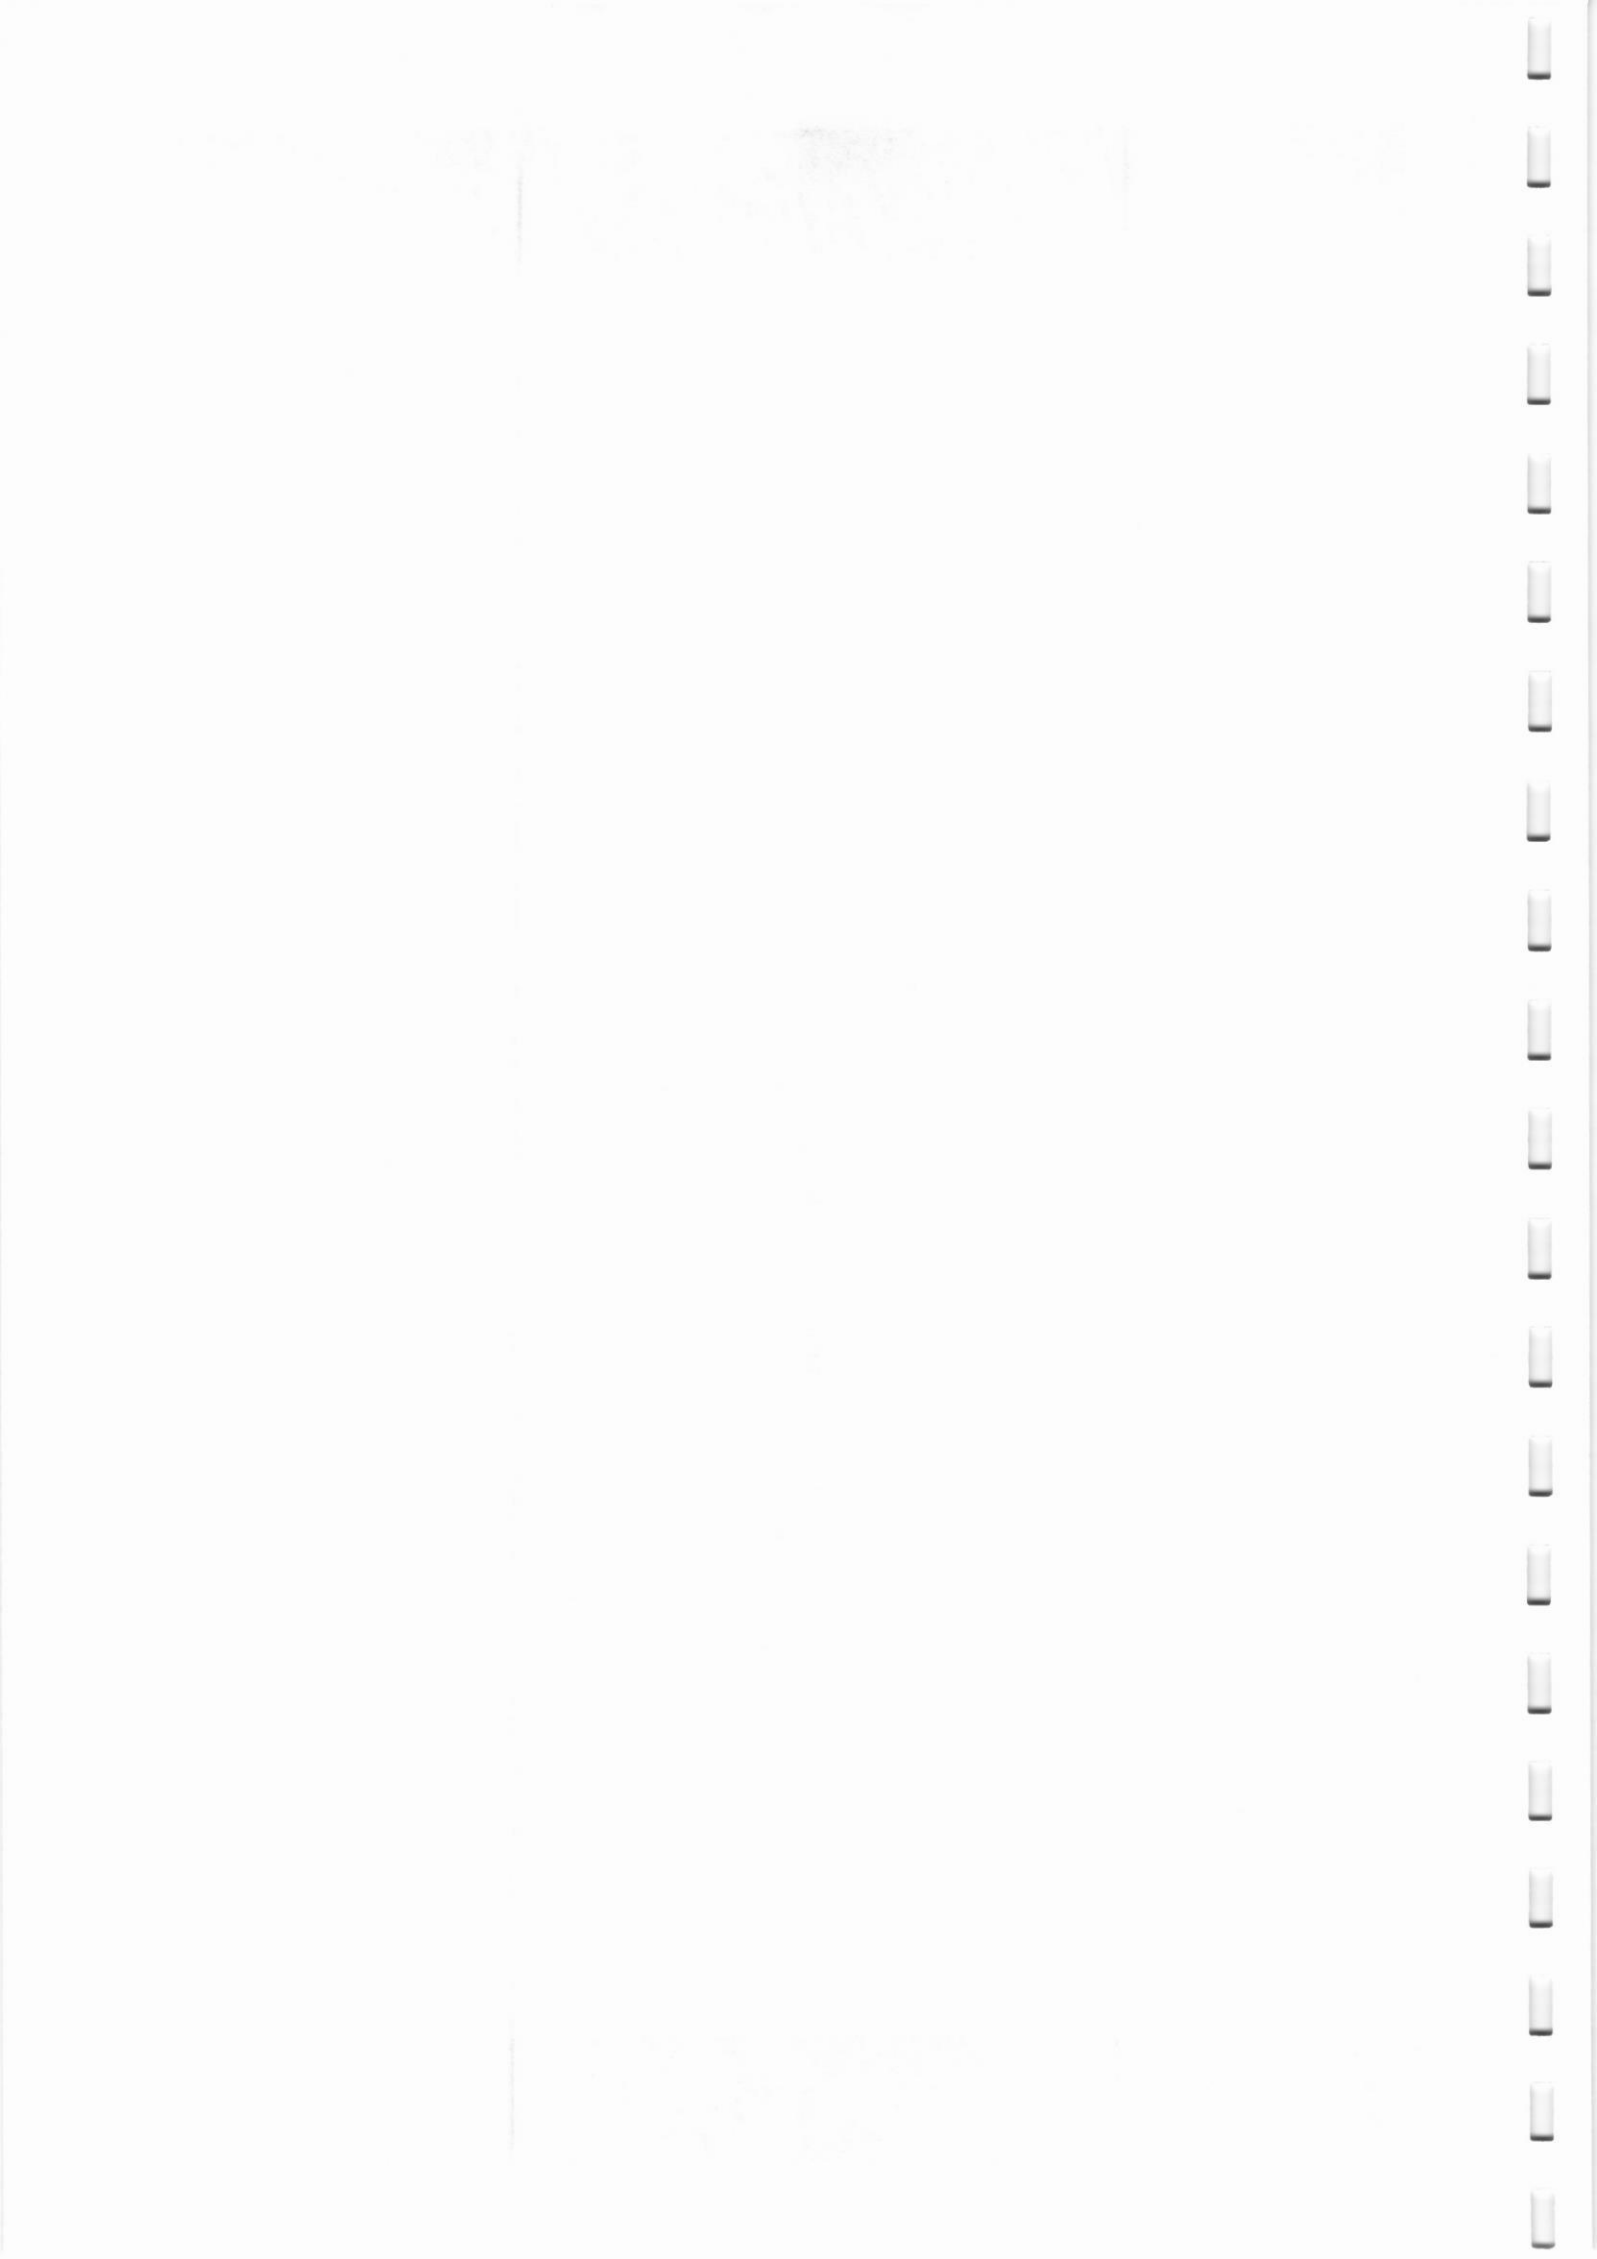

**Prisjetimo se mnogobrojnih
dobrobiti rijeka za cijeli ekosustav**

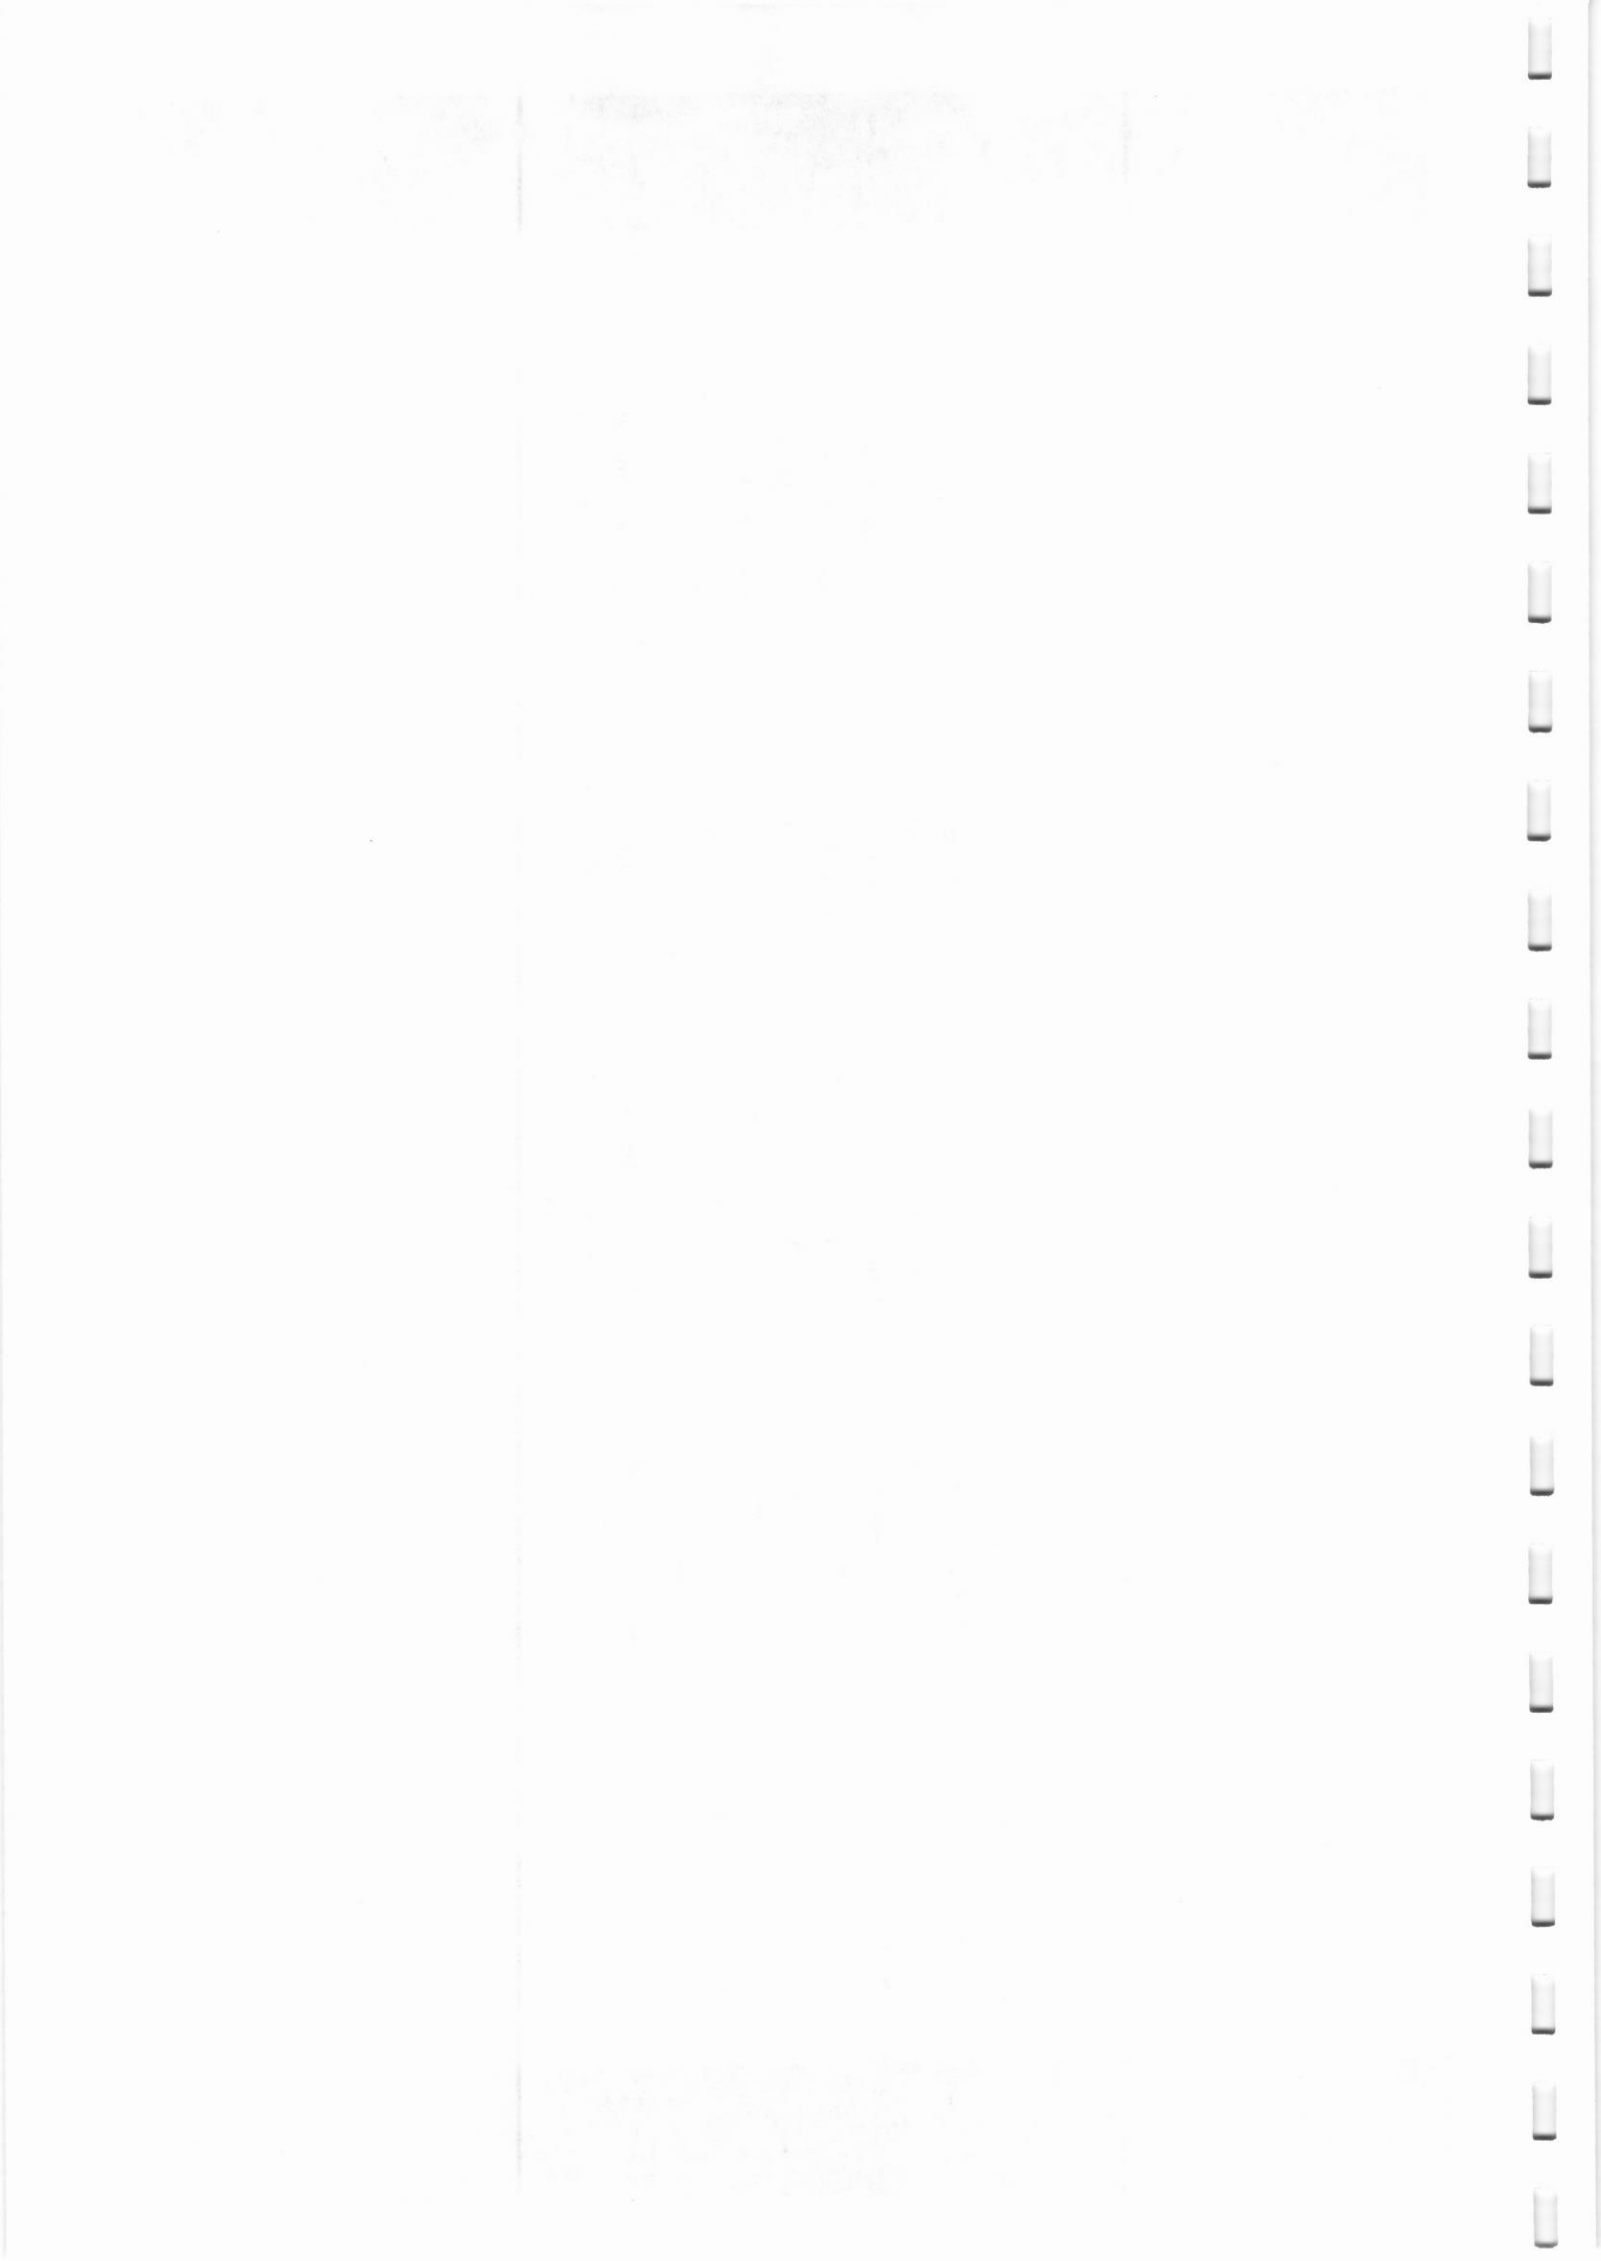

- stabiliziraju mikroklimu
- pročišćavaju vodu i zrak
- osiguravaju hranu za ljude i životinje
- ublažavaju utjecaj poplava i suša
- pospješuju zdravlje i osjećaj sreće
- podržavaju bioraznolikost u vodi i izvan nje
- sprječavaju gubitak obradivih površina i imovine

Peticija provedena u sklopu kampanje za zaštitu rijeka na stranici losingrivers.com prikupila je 20175 potpisa, a ovo su njezini potpisnici:
